SYNDROMIC CATEGORIES	TOTALS
Influenza-like Illness Malaise, headache, fever, cough and sore throat, in the absence of known cause.	
Hemorrhagic Disease Bleeding from skin or mucus membrane surfaces or reddish or purplish spots or discolorations on the skin or mucus membrane surfaces.	
Gastrointestinal Illness Diarrhea, vomiting, abdominal pain or cramps, with or without fever.	
Neurologic Illness Headache, sensitivity to light, confusion, convulsions, double/blurred vision, drooping eyelid(s), muscle twitching, difficulty talking/swallowing, weakness or paralysis.	
Rash Illness Rashes with or without fever (including chicken pox, exanthema, dermatitis, erythema).	
Fever Illness Fever of unknown origin (such as acute febrile illness, viral syndrome, sepsis, suspect infection).	
Respiratory Illness (Other than influenza-like illnesses) Cough, sore throat, trouble breathing, pneumonia and other respiratory conditions, with or without fever. <i>Please do not enter influenza-like illness here.</i>	
Chemical Exposure Chemical exposure differs from the others in that the suspect agent is not biological & onset is sudden (within 60 minutes, often within 15 minutes or less). List any chemicals or other agents that may have been involved in the reported exposure/s in the Other Information section at the bottom of this form.
